

**Planning, Building & Zoning**  
**September 2011**

**Permits/Inspections**

The building department issued a total of 83 permits totaling \$18,362 during the month of September. It issued 32 more permits and took in \$12,028 more in permit fees than in September of 2010. The year to date totals are up by 160 permits issued totaling \$50,567 more than the previous year.

The Building Official attended a Mechanical Conference in Myrtle Beach and a Commercial Electrical class in Columbia in September. Continued education credits are given for these courses.

A total of 111 inspections were performed in September. This is 18 more than were done in September of 2010. The department has been busy with numerous plan reviews including plans for 6 new single family residences and contractor/developer meetings. Also, staff has completed the FEMA Community Rating System Annual Recertification process and began working with next year's CRS projects in anticipation of lowering the Town's Flood rating. Staff has also completed FEMA's Repetitive Loss update for the year. Based on information obtained through the department documentation supplied by the Public Works Director, all properties listed as "Repetitive Losses" within the town may be removed from this classification due to efforts of the town in support of Flood Damage Prevention and several town projects addressing drainage problems. FEMA will evaluate the information we sent to determine if all properties will be removed from the Repetitive loss category. Staff will inform Council of the results once the information is provided to the department from FEMA.
