To Whom It May Concern:

Mr Paul Griffin is a patient here at MUSC in the Movement Disorders Program with a working diagnosis of Parkinsons disease which is a progressive neurological condition in which there is no known cure. As disease progresses, patients have difficulty with balance, mobility, strength, and are at great fall risk. Mr Griffin has had symptoms since at least 2011 and was diagnosed in 2012. He is finding it much more difficult to enter and leave his home due to its elevation and steps. In order to keep him as mobile and active, it is recommended a platform lift be installed in his home in order to maintain a good quality of life. Please consider this recommendation and assist this patient with his needs. If you have any questions or concerns, please feel free to contact our office at 843-792-7262.

Sincerely,

Amy Delambo NP-BC
