HIGH QUALITY TAP WATER WILL AFFECT SOME CUSTOMERS WITH UNIQUE TASTES OR NEEDS

The Town has long relied on groundwater as an inexpensive source for your water needs. Due to the low quality of this water, the Town is now turning to treated surface water. Since the quality of the treated surface water will be so much better, it will require some changes by some Town customers. The following information is provided to assist those customers who have some unique needs or tastes. It is hoped this information will help to prepare for the high quality water to be delivered in September 1991.

Dialysis Equipment Operators

The disinfectant chlorine used to keep your current water safe and protect your health from bacteria will be changed. A new and better disinfectant called chloramines will be used in the new higher quality water. The change is being made because chloramines is longer lasting and has less taste and odor. Although chloramines is safe for consumption, those who use dialysis equipment must remove any disinfectant before the water is introduced to the dialysis equipment. The change in the type of disinfectant will require adjustments to be made in the system. Dialysis system operators must be able to test for chloramines in order to detect it and make the appropriate adjustments.

Aquarium and Fish Tank Owners

The change in disinfectant also means that if the water is to be used for fish tanks it will need to be chemically treated to remove the disinfectant. Fish are very sensitive to either chloramines disinfectants, and if it is not removed prior to placing the fish in the water, the fish could experience severe stress. Chlorine, being a less stable disinfectant, dissipates or is released into the air if allowed to stand in an open container overnight. Chloramines, however, are much more stable and will probably take several days to dissipate. Thus, chemical treatment may be required. Chloramines are easily removed with inexpensive drops or tablets available at stores that sell tropical fish supplies.

Cleaning Businesses, Including Laundries, Hotels, Motels, Restaurants, Etc.

The new water will be much lower in alkalinity (at 20 to 30 mg/l) and will have a pH closer to neutral (7.5). It will also not be as soft (hardness at 20 to 30 mg/l). As a result, soap sudsing will probably be less and more soap may be required to achieve the same sudsing action. Commercial customers who use a lot of soap may need to contact their soap suppliers for information about the effect the new water may have on their products and what they may need to do to accomplish their objectives.

Beauty/Barber Shops

Some shampoos, dyes, tints and other water-related treatment products used in the hair care industry may be sensitive to either the pH of the water or the disinfectant used. Product suppliers should be contacted about the sensitivity of their products to either a pH change, from 8.3 to 7.5, or the disinfectant change from chlorine to chloramines. If any products being used are sensitive to either, alternative products, which have been adapted to these new characteristics, are available.

Food Service/Restaurants

The new water will contain much less dissolved salts, which will affect the taste of many food products. Additional salt or seasonings may be necessary to maintain the same flavor. Also, some foods, such as tea and coffee, may require more or less tea leaves or coffee beans to achieve the same richness. This is just a matter of experimenting to suit individual taste.

Other Unique Needs

If you have other unique needs, have questions or require further information on these or other topics, please call Town Hall at 238-5531 during normal business hours, 8:30 am to 5:00 pm.

*Fluoride to be added per DHEC and ADA Recommendations
Dear Residents:

On July 20th, during the summer meeting of the Municipal Association of South Carolina in Charleston, I had the honor, as Mayor of Surfside Beach, of accepting the Association's Municipal Achievement Award in recognition of the Town's All Children's Park, the first of its kind in the state and one of only three in the nation. A new and innovative concept in parks, it is designed to allow both physically disabled and able-bodied children to play together side by side.

When the Town became interested in building such a park, extensive research was done to determine the cost. Town officials realized we were in a position to fund only 50% of the total cost. It was therefore decided to approach the SC Department of Parks, Recreation and Tourism regarding a grant to purchase the specially-designed playground equipment. The grant was applied for and awarded.

Presentations on the park concept were then made to local civic and service organizations. The South Strand Sertoma Club stepped forward and agreed to build the park as a community service project and donated building materials and labor. With assistance from PRT and enthusiastic local support, All Children's Park became a reality on December 19, 1990, when Lt. Governor Nick Theodore, along with Town Officials, cut the ribbon officially opening the facility.

Located at the corner of 10th Avenue South and Hollywood Drive, the park is open from 8:00 am to dusk daily. All equipment is designed for the safety, ease and comfort of the children. Swings are of a netted hammock sling design, which conforms to the shape of the child, and are available for checkout at the Surfside Beach Police Station. Also featured is a cantilevered sandbox which allows a wheelchair-bound child to roll up to it. The park contains three sliding boards, two which slope down from one side of the deck and end at ground level on a rubberized padded cover, and a third which slopes down and into the sandbox. A 4'x4' tic-tac-toe board and a steering wheel attached to a wooden rail which transforms into a boat, car or other imaginary vehicles are also available to park visitors. A landscaped, shaded area with picnic tables and adult swing adjoins the park, which is covered with crushed wood chips rather than concrete.

The Town is constantly receiving inquiries about the park from interested cities across South Carolina as well other states. Area schools use the facilities for educational and physical field trips for both physically impaired and able-bodied students. To be able to provide such a facility is a rewarding experience for the Town of Surfside Beach, but more than that, the park is a recreational facility that has become the pride of this community in its response to meet the needs of all our young folks. Please come and see it for yourself.

Yours truly,

Dick M. Johnson, Mayor

---

**DIGIOVANNI LEAVES LEGACY OF SUCCESS**

Pat DiGiovanni, Surfside Beach’s Town Administrator since October of 1986, bid “Adieu” to Mayor and Council and the citizens of Surfside Beach at the Town Council meeting of July 1, 1991. Pat accepted the position of Assistant City Manager in Kalamazoo, Michigan.

Pat came to the Town on October 6, 1986, and among the many projects and programs accomplished during his tenure are: our speedy recovery from Hurricane Hugo; a balanced budget for 5 years; achievement of Certificate of Excellence in Financial Reporting 2 consecutive years; refinancing of FMHA sewer loan, saving $3 million; implementation of employee “Pay for Performance” system and employee incentive awards program; $4.3 million bond referendum for comprehensive streets/drainage project; development of full service Fire Department and reduction of ISO rating from 6 to 4; streamlining of Sanitation Department services and implementation of “mobo” cart and front end loader system; purchase of several new and modern pieces of equipment to better serve citizens; negotiations on Bull Creek Water Plant; development of capital replacement and emergency preparedness funds; rewrite of Zoning Ordinance; completion of street lights program; building of All Children’s Park and purchase of adjacent lot for expansion; creation of Manager’s Advisory Committee for direct communication with Town employees; computerization of municipal court system; Highway 17 beautification program; revival of employee safety program and Safety Committee; institution of recycling pilot program; creation of VISTA (Volunteers Improving Surfside Beach Through Action) to assist employees in departmental tasks; construction of new elevated water tank.

We shall miss Pat, his energy and enthusiasm and his dedication to the Town of Surfside Beach. Good luck and best wishes to the DiGiovannis in their new life in Kalamazoo.

**INTERIM POSITIONS FILLED**

At a special Town Council meeting on June 20, 1991, Town Council appointed Finance Director Neil Ferguson as Interim Town Administrator to fill the vacancy created by the resignation of Pat DiGiovanni. Terri Chatfield, Town Accountant, has been named as Interim Finance Director. The Town has placed advertisements to fill the post of Town Administrator.
POLICE BEAT

When you have a stray dog or cat in your neighborhood, who ya gonna call? In the Town of Surfside Beach, it's Officer Howard Gold, 'the Town's new Community Service Officer. One of his duties will be handling animal complaints. The Town has built a mobile animal pen which will be used to transport stray animals to the county pound on Highway 90 in Conway. Officer Gold will also carry dog licenses with him, so that a dog's owner may purchase it from him without a trip to Town Hall.

Officer Gold, who retired after 20 years with the Baltimore, MD Police Department, will have several other duties including that of beachfront officer during the summer months, working with the business community on their special needs and transporting prisoners to J. Reuben Long Detention Center.

Robert "Bert" Allen is our new telecommunications officer. Officer Allen, who worked for 12 years as a court recorder, moved to area from Indiana.

A new 1991 Chevy Caprice police cruiser has been put in service, replacing a 1987 Ford which had in excess of 100,000 miles.

Because of the high number of alcohol-related traffic accidents in Horry County, our department has been selected to receive the new "Datamaster," a state-of-the-art replacement for our present 1968-model Breathalyzer. Our department is one of the first in the state to receive this machine, and its entire $6,500 cost is being paid by the state.

FIRE DEPARTMENT HAPPENINGS

Second Avenue North Structure Fire

Many questions have been received about the structure fire which occurred on June 13 at Second Avenue North and Poplar Drive. This was a condemned building which was donated to the Fire Department for training purposes. The Department held extensive firefighting training in this building for five weeks before it was allowed to burn down during the last session.

Surfside Beach is lucky in that we experience very few structure fires. That means, however, that our firefighters get very little experience in fighting them. Therefore, when we get a building such as the one on Second Avenue, we utilize it to its fullest advantage before it is destroyed.

Every precaution is taken to ensure that the operation can be accomplished without exposing surrounding property or persons to danger of inconvenience, and we appreciate your understanding.

SBFD Prepared For Hazardous Materials Emergencies

On May 11, 1991, an auction was held at Big Luke's Restaurant to raise funds for the purchase of specialized equipment to assist our Department in handling incidents involving hazardous materials. Over $1,500 was raised.

These funds purchased specialized suits, absorbent materials, special container patch kits and recovery containers. These items have been placed in service and will allow us to better handle situations involving chlorine, flammable liquids and other hazardous materials.

Thanks to Luke Lucas and his crew at Big Luke's Restaurant and to all of the merchants who donated items to be auctioned and to all others who helped to make the auction a success.

Fire Prevention — A Year-Round Necessity

The week of October 8th is traditionally observed nationwide as Fire Prevention Week. During this week, the Fire Department makes a special effort to spread the word of fire prevention to all citizens. That is not the only time you need to practice fire safety, however.

This time of year we are especially susceptible to brush and grass fires. These are often started by open fires which get out of control and by fireworks.

Please keep in mind that permits are required from the Fire Department before you do any open burning and that fireworks in the Town of Surfside Beach are illegal and dangerous.

Firefighters Needed

As always, we are on the lookout for persons who would like to become Volunteer Firefighters. All training and equipment will be supplied. All you have to provide is the desire to serve your community in a way that very few can. The knowledge and skills you acquire will benefit you for the rest of your life. To find out more, contact the Fire Station.

Fire Hydrant Obstructions Can Hinder Firefighters

We've noticed that some folks with fire hydrants near their property have tried to beautify them by planting flowers and shrubs around them. While these decorative plantings might look more pleasing than the hydrant, they can also cause a delay in obtaining a water supply for firefighters. It's not fair to your family or your neighbors who could lose lives or property because hydrants are not easily accessible or visible. For safety's sake, please keep all shrubs, plants and other obstructions at least ten feet from fire hydrants.

VISTA SEeks VolunTEERS

VISTA — Volunteers Improving Surfside Beach Through Action — is a new concept at Town Hall. We have seen that Surfside Beach and the surrounding areas have many talented and skilled people who have the desire and the time to contribute for the good of the community. We are committed and want your assistance to help the Town be the best it can be.

We have developed volunteer positions in many areas that range from answering the phone in one department during lunch hour, to auditing business licenses, to helping maintain the Town's green areas. Some positions require certain expertise, however, we have many areas of need where no special training is necessary. The volunteer can schedule to work according to convenience, even if it is only one hour a week.

VISTA will give the volunteer the satisfaction of knowing they are doing something important for their community by working firsthand in the Town government. It will also afford the chance to meet new people and gain new skills.

Linda Barnes will be the volunteers coordinator. She has had extensive experience in dealing with the public. She has been the Unit Director for the Cancer Society in North Carolina, served on the Board of Directors and later as President of the Catawba County Heart Association and was a delegate to the National Convention of the Federated Women's Club. Linda is an asset to VISTA and will assist the volunteers in locating the best area for them.

Please plan to join the VISTA program and become a part of a new program designed for you.
WATER, WASTEWATER AND SANITATION CHARGES EFFECTIVE JULY 1, 1991

The Fluoride Level Notice, reproduced elsewhere in this newsletter, is required by law. Mandates passed by federal and state governments require that we comply with and establish regulations, such as the removal of fluoride from our water system. These regulations cost money to implement, and we the citizens of Surfside Beach must pay the bill.

Town Council gave its approval for an independent consultant to review the issues facing the Town, such as providing quality water and disposal of solid waste, and to devise an equitable rate structure that would ensure the needed revenues for debt retirement and operations costs and meet future needs.

On the quality water side of the issue, the Town joined with several other entities to construct a surface water treatment plant on the Pee Dee River. This plant, located at Bull Creek, will satisfy all current federal regulations and provide top quality drinking water... as good as any drinking water produced by any utility in the nation. Space does not permit the full findings of the consultant, but any interested citizen may review the study, available in the Town Clerk's office at Town Hall, from 8:30 am to 5:00 pm Monday through Friday.

In 1989, Grand Strand Water and Sewer Authority, which treats our wastewater, increased the rate charged to the Town for treatment. This increase was never passed on to our customers. The Town was notified this June of another increase by GSWSA. Both increases have made it necessary that the Town raise its rates in order to recoup the costs.

In the area of solid waste disposal, operational and personnel costs have risen over the years in order to provide users with twice weekly residential services, commercial service and weekly trash/litter control. Taxpayers have been subsidizing these services over the years with their tax dollars. The purpose of the increase is for users of the services to pay their fair share of the costs to provide them. Additional increases are sure to follow as more regulations are imposed and costs to provide the services increase. Disposal of solid waste is, and will continue to be, a subject of vital concern to our environment. Recycling is part of the solution, but it is not the answer.

These increases were not and are not intended to penalize any segment of our community. We have attempted to comply with regulations and issues which the Town faces in the most equitable manner possible.

NEW RATES
Effective July 1, 1991

DUMPSTER CHARGES
6 cubic yard $4.80 per pick up
8 cubic yard $6.40 per pick up
Plus $3.00 per month minimum

GET THAT WATER HEATER READY FOR CLEAN WATER

When top quality drinking water comes your way in September, you'll be receiving better and cleaner water than what's now flowing into your home or office. Your water heater may need a little help in making the switch.

There may be some old mineral deposits in your cold and hot water lines, and there definitely will be mineral deposits that have built up over the years in your water heater. The cleaner water you'll soon receive could flush them into your drinking water.

Since water heater manufacturers recommend flushing your water heater once a year, you may wish to time your flushing to anticipate the switch to clean water. If you don't normally flush your water heater as recommended, you should plan to do so before the switch to top quality water in September.

Check out the following instructions or call a plumber for assistance. Come September the water flowing from your water heater won't just be hot, it'll be clean, too.

INSTRUCTIONS FOR FLUSHING TYPICAL WATER HEATER

(For general information only. Please refer to your water heater manufacturer's instructions for possible variations and safety considerations.)

Step 1 (For electric water heaters) Shut off the electric supply to the electric water heater. WARNING: Electricity must be off at all times while the tank is empty.
Step 2 (For gas water heaters) Turn the gas control knob to the "off" position. WARNING: If you are not familiar with procedures for relighting your gas water heater, please consult a trusted plumber or gas technician.
Step 3 (For cold water supply) Turn off the cold water supply to the water heater. Most water heaters have a shut off valve in the cold water inlet line on top of the tank. If not, water service will have to be shut off at the street shut off valve in front of your meter.
Step 4 (For hot water faucet) Open hot water faucet in kitchen and/or bathroom. Leave open during tank shut down.
Step 5 (For drainage) Connect a hose to the drain valve on the bottom of the water heater and route hose to an adequate drain area.
Step 6 (For cold water supply) Open cold water supply valve to the water heater for 30 to 60 seconds, then shut off.
Step 7 (For drain hose)畅 Open water coming out of drain hose for sediments and clarity.
Step 8 (For tank) Continue Steps 6 and 7 until there are no noticeable sediments and the water is clear.
Step 9 (For flush water) Once flush water (Step 8) is clear, your heater is clean and you are ready to fill water heater for use.
Step 10 (For drain hose)畅 Close drain valve on bottom of tank and remove drain hose.
Step 11 (For cold water supply) Open cold water supply (reverse of Step 2). As your water heats, you will notice air escaping from kitchen and bathroom faucets. Leave these outlets open until a steady flow of water is being discharged.
Step 12 (For kitchen and/or bathroom faucets) Close kitchen and/or bathroom faucets.
Step 13 (For cold water heaters) Turn on electricity to electric water heater. Hot water should be available in 30 to 45 minutes.
Step 14 (For gas water heaters) Follow manufacturer's lighting instructions to restart gas water heater.

HELPFUL TIPS FROM THE TOWN OF SURFBEACH ON HOW TO GET YOUR WATER HEATER READY FOR CLEAN WATER

ELECTRIC WATER HEATER (Top)
- Cold water red valve
- Hot water red valve
- Electric breaker panel
- Cold water input
- Hot water input
- Drainage line
- Drip pan
- Ball valve
- Relief valve
- Float valve
- Drain valve
- Pressure relief valve

GAS WATER HEATER (Bottom)
- Hot gas input
- Cold gas input
- Pilot light
- Pressure relief valve
- Drain valve
EMPLOYEE OF THE QUARTER — SPRING 1991

The Town of Surfside Beach congratulates Don M. "Mike" Lewis, Firefighter, as Surfside Beach "Employee of the Quarter — Spring 1991." Mike has been with the Town since July 25, 1988, and was "Employee of the Quarter — Fall 1989." He is also a Reserve Police Officer with the Surfside Beach Police Department.

CLEAN CITY BEAUTIFICATION COMMITTEE AWARDS

Highway 17 Business: April — Dr. William B. Cox, 1012 8th Avenue SW; May — Surfside United Methodist Church.

PERSONNEL POTPOURRI

A hearty WELCOME to several newcomers: Janet Thacker is the new Finance Assistant and comes to us from Fairfax County, VA, Business License Department; Jeff Gotwalt is a new Firefighter with the Town and comes to us from Pennsylvania; Roberta “Bert” Allen, new Telecommunications Officer in the Police Department, hails from Newburgh, IN. A new position, Public Service Officer, was funded in this year’s budget, and Howard Gold, 20-year veteran of the Baltimore, MD, Police Department was hired to fill that slot. We hope each of you will enjoy being a part of our Surfside Beach family.

STREETS/DRAINAGE PROJECT UPDATE

As of July, the Town’s comprehensive project has progressed halfway through the twelve month contract period. However, certain portions of the work are past 50% complete. Primary drainage system work is now close to 85% complete, and asphalt is down on 55% of the roads to be paved … good news, indeed, as we head into the “off season.” It should be noted, however, that final dress-up, i.e., grassing, shoulder work and other finishing work, is lagging somewhat behind schedule, due in part, to adverse weather conditions. Patience is requested in this regard, as the Town’s contractor is re-gearing up for this and will be back on schedule within a few weeks. In any event, all work should be completed on schedule by the end of the contract period.

Paving has now reached Surfside Drive from the south, and by press time, should be well into the north end of Town. The end of the dusty dirt road is near!

TOWN HOSTS SISTER CITY VISITORS

Mayor Johnson and members of Town Council hosted a visiting delegation from Romania, including the Prefect (Governor), Dr. Grigore Zanc, and 11 dignitaries from the County/State of Cluj. The Town of Surfside Beach recently “adopted” the City of Aiud, in Cluj, as its Sister City under the Sister City International Program. The delegation came to Surfside Beach as part of a trip to South Carolina to meet with officials in several cities including Columbia, Greenville and Spartanburg. The purpose of the trip was to exchange ideas and to gather information and expertise with which to improve the economy and quality of life in Aiud and Cluj since their release from communist rule.

On July 27th, the delegation, along with Town Officials, attended a luncheon at Quincy’s, sponsored by Surfside Beach Area Business & Professional Association, Surfside Area Rotary Club, Conway National Bank, Moore & Associates and Surfside Realty. Following the luncheon, they were given a tour of the Town and refreshments at the home of Mayor and Mrs. Johnson. They also attended an afternoon prayer service at Lakewood Campground. During the evening, the group attended a performance of the Carolina Opry as the guests of Mr. Calvin Gilmore.

FLUORIDE LEVELS

The US Environmental Protection Agency requires that we give you this notice on the level of fluoride in your drinking water. The drinking water in this Community has a fluoride concentration as set forth below:

<table>
<thead>
<tr>
<th>WELL SAMPLE</th>
<th>FLUORIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>#1 — 1st Avenue South</td>
<td>4.01 mg/l</td>
</tr>
<tr>
<td>#2 — 3rd Avenue North</td>
<td>3.68 mg/l</td>
</tr>
<tr>
<td>#3 — Surfside Drive</td>
<td>3.74 mg/l</td>
</tr>
</tbody>
</table>

Federal Regulations require that fluoride, which occurs naturally in your water supply, not exceed a concentration of 4.0 mg/l in drinking water. This is an enforceable standard called a Maximum Contaminant Level (MCL), and it has been established to protect the public health. Exposure to drinking water levels above 4.0 mg/l for many years may result in some cases of crippling skeletal fluorosis, which is a serious bone disorder.

Federal Law also requires that we notify you when monitoring indicates that the fluoride in your drinking water exceeds 2.0 mg/l. This is intended to alert families about dental problems that might affect children under 9 years of age. The fluoride concentration of your water exceeds this federal guideline.

Fluoride in children’s drinking water at levels of approximately 1 mg/l reduces the number of dental cavities. However, some children exposed to levels of fluoride greater than about 2.0 mg/l may develop dental fluorosis, which in its moderate and severe forms, is a brown staining and/or pitting of the permanent teeth. Because dental fluorosis occurs only when developing teeth (before they erupt from the gums) are exposed to elevated fluoride levels, households without children are not expected to be affected by this level of fluoride. Families with children under the age of 9 are encouraged to seek other sources of drinking water for their children to avoid the possibility of staining and pitting.

Your water supply can lower the concentration of fluoride in your water so that you will still receive the benefits of cavity prevention while the possibility of stained and pitted teeth is minimized. Removal of fluoride will increase your water costs. Treatment systems are also commercially available for home use. Information on such systems is available at the address below. Low fluoride bottled drinking water that would meet all standards is also commercially available. Free (maximum of 5 gallons per week) low fluoride drinking water is available for all Surfside Beach water account customers at the following locations:

1. North entrance of Surfside Beach Town Hall;
2. Tad’s Hardware, Atlantic Avenue, Garden City;

For further information, contact Public Works Director Ron Peake, Surfside Beach Town Hall, 209/75, or call 238-5501. The Town has entered into a regional contract with Grand Strand Water and Sewer Authority, the City of Conway, and Little River Water and Sewer District to construct a surface water treatment plant on Bull Creek. Projected completion date is Fall of 1991. At that time, fluoride concentrations will be reduced below 2 mg/l.
SURFSIDE DRIVE DEVELOPMENT STUDIED

A new library, improved drainage and street lighting are a few of the items the Town is looking at to enhance our "main street", Surfside Drive.

As originally intended, this project encompasses the 11 blocks of Surfside Drive, from US Highway 17 to Ocean Boulevard, an area containing business, residential and amusement uses.

During the design process, an opportunity to additionally study the Fuller Park area was created by the desire of a Surfside Drive property owner. Specifically, a cultural use for the area, such as a library, formal gardens or other similar community project was proposed as a destination and focal point of the entire redevelopment.

To facilitate this opportunity, the property owner is willing to contribute a substantial piece of property adjacent to Fuller Park in exchange for the commitment by the Town to pursue this type of development. The concept was favorably met by the Horry County Library Commission and current efforts toward this possibility are underway. The study concentrates on the street redevelopment, exclusive of the cultural arts potential. It should be noted, however, that the possible development of the Fuller Park area has been considered in the design decision, and the future opportunities will not be impeded in any fashion by these results.

RECREATION DEPARTMENT NOTES

Special Events

The Recreation Department participated in the annual Sun Fun Volleyball Tournament on Sunday, June 2nd. There were ten teams participating this year with the Flyers from the Myrtle Beach Air Force Base coming out on top. All teams had a great day of sun, fun and volleyball.

Classes at Civic Center

Classes held at the Civic Center this quarter included: day and evening aerobics, show biz dance classes and shag lessons. Classes were suspended for the summer, but will resume sometime in September.

Youth Sports

The regular season has come to an end for the 1991 baseball and softball teams. League champions were: Dixie Minor League coached by Ty Reuber — Giants; Dixie Youth League coached by Bobby Steele — Dodgers; Dixie Boys League coached by Bill Van Dyke — Sox; Dixie Ponytails coached by Pat Flohr — Sun Birds; Dixie Belles coached by Carol Robinson — Angels; Pre-Majors coached by Noah Brunty; Dixie Majors coached by Andy Lanier. Congratulations to all the teams for a great season. Also, our T-ball season was a great success this year.

We held the All-Star selections for all leagues, and these young men and women played in their respective post-season tournaments. The Dixie Minors, Dixie Youth and Dixie Boys played in either sub-district or district tournaments in Georgetown. Surfside Beach was the host for the Dixie Ponytails and Belles this year. Our Dixie Pre-Majors played in Waccamaw and the Dixie Majors played in North Myrtle Beach. All teams represented Surfside Beach well.

Our 1991 football and cheerleader registration will begin August 19th from 4:00 to 6:00 pm. Please watch for more information on this registration.
